I develop **scalable** and **maintainable** software solutions across domains including **Financial and Regulatory Reporting Dashboards**, **Over-The-Top (OTT) applications**, **Human Resource Management Systems (HRMS)**, **Asset Management Systems**, and **E-commerce platforms**. With strong **communication skills**, I work effectively with teams, ensuring **successful project delivery** and **alignment with stakeholders**.

SKILLS

Programming	JavaScript, Typescript, Python, Elixir
Frontend Frameworks	HTML5, CSS, React.JS, Svelte, Next.Js, LiveView-Elixir
Backend Frameworks	NodeJS 12+ with Express, Phoenix, Python with Flask and Fast API
Mobile Frameworks	React Native, Android Studio with Kotlin
Styling Frameworks/ Library	SCSS, Bootstrap, Tailwind CSS
Database	MongoDB 6+, Firebase, PostgreSQL 15+
Technical	Git, GitHub, Docker, AWS, REST API, GraphQL API, SDLC, Bug Trackers, Bash, Zsh
Hobby Software	Notion, DaVinci Resolve, Cubase AI, GIMP, Audacity

EXPERIENCE

Jan 2025 -
Present

Associate-2, PWC PRICEWATERHOUSECOOPERS ACCELERATION CENTER, Bangalore

Full Stack Developer :

- Worked on a **full-stack React and Node.js** tool to automate the generation of brand-compliant, professional PPTX presentations for internal and client delivery.
- Created a **AI orchestrator tool** designed to interface with multiple sub-agents like **Azure, Jira, Planner, Sharepoint, Github, Outlook** and **streamline complex workflows** and make them **report and operate from our platform**. On the frontend, I built a highly scalable architecture using React, featuring **custom state management** system tailored for performance. Every component is engineered for maximum modularity, ensuring the platform remains robust as it expands.
- Developed frontend application from scratch using React.Js to determine performance of **Banks** with **Gen AI features like chat**. Used **D3.js** to **generate chart widgets** and used **html tables** for table widgets. Used **GraphQL mutations and queries** to communicate with python **microservice backend**.
- Worked and developed on an application on both frontend with React.Js and backend with Node.Js and few third party entities with python where clients can create their own ppt templates with PwC compliant rules.
- Upskilled myself in AWS tools like **EC2, S3, IAM policies, DynamoDB, SageMaker, Lambda Functions**, **Bedrock** and **Docker** and **Kubernetes**.

D3.js Python Pandas AWS EC2 RSuite Azure Microservices IAM GraphQL LLMs

Nov 2023-
Jan 2025

Software Engineer-I (Full Stack Developer), ZONGOVITA, Bangalore

- Developed and maintained an **Android** application for an **Asset Management System** using **React Native**, focusing on intuitive **UI/UX design** and implementing core **functional requirements**. Leveraged **React Hooks** and **Redux with Saga** for efficient state management. Integrated **REST APIs** to ensure seamless functionality and handled deployment on the **Google Play Store** using the **Play Console**.
- Collaborated on resolving **Node.js** bugs and contributed to API development for the **Attendance Management System** and **Asset Management System**, ensuring smooth backend operations.
- Created comprehensive **Business Requirement Documents** and **Technical Specification Documentation**, and initiated a plug-and-play, **microservices-based AI Dashboard** utilizing **React.js**, allowing for modular and scalable deployment.
- Automated the **dynamic generation of Excel reports** by querying data from **MongoDB** using **Python**. Developed scripts that extract, process, and organize data into structured reports, significantly improving **workflow efficiency** and ensuring accurate data management. Implemented advanced **Excel formatting techniques** to create professional-grade reports, streamlining reporting processes.

Sep 2021- Nov 2023	Junior Front End Developer, VENTUNO TECHNOLOGIES, Chennai Contributed to the team from September 2021 to November 2023, starting as an intern and transitioning to a full-time position in November 2021 . > Developed an EPG (Electronic Program Guide) Widget for an OTT platform using React.js (Typescript) + SCSS during the internship period, delivering the project from September to October 2021. > As a full-time employee, contributed to various OTT platforms, implementing new functional features, migrating legacy code from class-based components to functional components, and fixing bugs using React.js, TypeScript, and SCSS. > Ensured code quality by setting up Sonar and ESLinting tools, testing tools, and test servers. > Created API documentation, developed and tested APIs using Postman, improving API functionality and debugging. > Wrote unit and integration test cases with React Testing Library (RTL), Jest, and performed end-to-end testing using Cypress, enhancing application reliability. > Managed source control with Git, implemented versioning with Git Tags, and utilized GitHub Actions for CI/CD automation. > Conducted thorough research and developed well-documented JavaScript POCs to effectively communicate feature proposals and technical solutions. > Implemented performance optimization strategies focused on Core Web Vitals (CLS, LCP, FID, FCP) to enhance SEO performance on a corporate website built with PHP. React.js JavaScript TypeScript SCSS React Testing Library Jest Cypress Git Sonar AWS Responsive Layouts
Aug 2018- May 2021	Freelancer, LOCAL BUSINESSES AND CLIENTS, Guwahati & Remote Helped local clients grow their businesses by : > Developed server-side logic using Node.js, improving application performance and scalability. > Built robust API endpoints with Node.js and Express.js, enhancing data communication. > Developed Android apps using React Native, Firebase, and designed UIs in Figma. > Led workshops on web technologies (HTML, CSS, JS) and game development with Construct 2. Node.js Firebase React Native Figma WordPress

EDUCATION

2020 **Bachelor of Technology, in Electronics and Communication Department**, Assam Science and Technology University(ASTU).
